**V. Read the passage and choose one correct answer for each question.**

One of the most famous monuments in the world, the Statue of Liberty, was presented to the United States of America in the nineteenth century by the people of France. The great statue, which was designed by the sculptor Auguste Bartholdi, took ten years to complete. The actual figure was made of copper supported by a metal framework which had been especially constructed by Eiffel. Before it could be transported to the United States, a site had to be found for it and a pedestal had to be built. The site chosen was an island at the entrance of New York Harbour. By 1884, a statue which was 151 feet tall had been erected in Paris. The following year, it was taken to pieces and sent to America. By the end of October 1886, the statue had been put together again and it was officially presented to the American people by Bartholdi. **V. Read the passage carefully and choose the best option A, B, C or D to answer.**

The Taj Mahal, in India, is one of the most beautiful buildings in the world, built over 300 years ago by the Shah Jehan as a tomb for his wife. Shah Jehan loved his wife very much. He wanted the tomb to be perfect, that's why he did not care about the time and money. Bearing this thought in mind, he found the finest workmen in all Asia to work on the building. It took over seventeen thousand men over 20 years to complete it. In front of the main entrance to the building, there is a long narrow pool. If you look in this pool, you will see all the beauty of the Taj Mahal in the reflection from the water.

Some people think the Taj Mahal is the most beautiful at sunset when the reflection of the building in the pool gleams like ruby. Others like it best at noon. Many think it is the most beautiful by moonlight. On nights when the moon is spending the night beside the pool. When morning comes and the Taj Mahal turns from silver to gold in the early sunshine, they go away, to return perhaps when the moon is full again.

**V. Read the passage and choose one correct answer for each question.**

Scientists often divide resources into two groups: renewable and non-renewable. When a resource is used, it takes some times to replace it. If the resource can be replaced quickly and easily, it is called renewable. If it cannot be replaced quickly and easily, it is non-renewable. All fossil fuels are non-renewable resources. Solar energy, air, and water are usually called renewable because there is an unlimited supply.

However, this definition may change if people are not careful with these resources. The amount of solar energy that reaches the earth depends on the atmosphere. If the atmosphere is polluted, the solar energy that reaches the earth may be dangerous. If humans continue to pollute the air, it will not contain the correct amounts of these gases.

Many resources are limited and non-renewable, and many are in danger of pollution. As a consequence, resources must be conserved and the environment protected. Conservation must become an important part of everyone's life.

**Question 31.** How many kinds of resources are mentioned in the passage?

- A. 2                                      B. 3                                      C. 4                                      D. 5

- A. The air won't contain the correct amounts of natural gases  
B. Life won't continue as it does  
C. Renewable resources will soon become non-renewable  
**D. All are correct**

**Question 34.** The word conservation in the passage is opposite to

- A. prevention    **B. Destruction**                                      C. protection                                      D. preservation

**Question 35.** Why do we have to conserve resources?

- A. Because many resources are limited and non-renewable**  
B. Because conservation plays an important part in everyone's life

**V. Read the passage carefully and choose the best option A, B, C or D to answer.**

The Asian Games owes its origins to small Asian multi-sport competitions. The Far Eastern Championship Games were created to show unity and cooperation among three nations: Japan, the Philippines and China. The first games were held in Manila, the Philippines in 1931. Other Asian nations participated after it was organized.

After World War II, a number of Asian countries became independent. Many of the new independent Asian countries wanted to use a new type of competition where Asian dominance should not be shown by violence and should be strengthened by mutual understanding. In August 1948, during the 14<sup>th</sup> Olympic Games in London, Indian representative Guru Dutt Sondhi proposed to sports leaders of the Asian teams the idea of having discussions about holding the Asian Games. They agreed to form the Asian Athletic Federation. A preparatory committee was set up to draft the charter for the Asian amateur athletic federation. In February, 1949, the Asian athletic federation was formed and used the name Asian Games Federation. It was decided to hold the first Asian Games in 1951 in New Delhi the capital of India. They added that the Asian Games would be regularly held once every four years.

One of the most famous monuments in the world, the Statue of Liberty, was presented to the United States of America in the nineteenth century by the people of France. The great statue, which was designed by the sculptor Auguste Bartholdi, took ten years to complete. The actual figure was made of copper supported by a metal framework which had been especially constructed by Eiffel. Before it could be transported to the United States, a site had to be found for it and a pedestal had to be built. The site chosen was an island at the entrance of New York Harbour. By 1884, a statue which was 151 feet tall had been erected in Paris. The following year, it was taken to pieces and sent to America. By the end of October 1886, the statue had been put together again and it was officially presented to the American people by Bartholdi. Ever since then, the great monument has been a symbol of liberty for the millions of people who have passed through New York Harbour to make their homes in America.

**V. Read the passage and choose one correct answer for each question.**

Scientists often divide resources into two groups: renewable and non-renewable. When a resource is used, it takes some times to replace it. If the resource can be replaced quickly and easily, it is called renewable. If it cannot be replaced quickly and easily, it is non-renewable. All fossil fuels are non-renewable resources. Solar energy, air, and water are usually called renewable because there is an unlimited supply.

However, this definition may change if people are not careful with these resources. The amount of solar energy that reaches the earth depends on the atmosphere. If the atmosphere is polluted, the solar energy that reaches the earth may be dangerous. If humans continue to pollute the air, it will not contain the correct amounts of these gases.

Many resources are limited and non-renewable, and many are in danger of pollution. As a consequence, resources must be conserved and the environment protected. Conservation must become an important part of everyone's life.

**Question 31.** How many kinds of resources are mentioned in the passage?

A. 2 B. 3 C. 4 D. 5

**V. Read the passage carefully and choose the best option A, B, C or D to answer.**

The Asian Games owes its origins to small Asian multi-sport competitions. The Far Eastern Championship Games were created to show unity and cooperation among three nations: Japan, the Philippines and China. The first games were held in Manila, the Philippines in 1931. Other Asian nations participated after it was organized.

After World War II, a number of Asian countries became independent. Many of the new independent Asian countries wanted to use a new type of competition where Asian dominance should not be shown by violence and should be strengthened by mutual understanding. In August 1948, during the 14<sup>th</sup> Olympic Games in London, Indian representative Guru Dutt Sondhi proposed to sports leaders of the Asian teams the idea of having discussions about holding the Asian Games. They agreed to form the Asian Athletic Federation. A preparatory committee was set up to draft the charter for the Asian amateur athletic federation. In February, 1949, the Asian athletic federation was formed and used the name Asian Games Federation. It was decided to hold the first Asian Games in 1951 in New Delhi the capital of India. They added that the Asian Games would be regularly held once every four years.
